THE DOCK AND DOOR COMPANY THAT CARES

TRU-BILT Industries Newsletter

Issue 3, 30 March 2010

## WELCOME TO 2010

It's hard to believe Christmas and the start to 2010 has been and gone and already we are into March.

Things here at *TBi* have started off with the workshop production schedule out past March and into April and we have opened our distribution centre just south of Sydney after months of planning.

Two truckloads of *TRU-SOUND™* doors were despatched to a new sound studio complex in Wellington and February saw two more. While we all love the big projects in this issue we review some of our everyday products for the food industry.

*Regards  
the TBi Team*

## INSIDE THIS ISSUE

## TRU-STRIP™ Kitset PVC Curtains.

The *TBi TRU-STRIP™* pvc curtains provide an ideal solution for those busy doorways requiring temperature and / or dust control.

We manufacture our strip curtains to suit the individual needs of the doorway. Our PVC is available in both standard (up to +50°C) and freezer grade (minus 40°C) in either flat strips for personnel access or ribbed for forklifts. We also have a red version to provide marker strips where the curtain overlaps the wall. These same red strips are often used for welding curtains in busy workshops.

The tracks are made using *TBi's* unique aluminium extrusion with cover plates to assist with easy cleaning. This coupled with stainless steel fixings ensures the *TRU-STRIP™* meets the strictest requirements of the food industry.

*A typical strip curtain with marker strips and additional protection using our TRU-GARD™ barrier and bollards*

*The TRU-KLEEN™ products have full certification for use in food processing areas*

## TRU-KLEEN™ PVC cleaner.

To help keep your strip curtains in top condition *TBi* has the *TRU-KLEEN™* PVC cleaner product which has been certified by the New Zealand Ministry of Agriculture and Forestry (MAF) for use in all areas of food preparation.

This means you can use *TRU-KLEEN™* not only on your PVC curtains but on any surfaces at all. You simply need to wash down food preparation areas with clean water after using it.

We can supply *TRU-KLEEN™* in handy 1.25 litre spray bottles and in either 5 or 20 litre jerry cans.

*Replacement PVC rolls for TRU-STRIP™ curtains*

## Schultz & Burns install Tru-Gard™ Barrier and Handrail at Manassen Foods in Sydney.

Manassen Foods have installed Tru-Gard™ barrier, handrails and personnel access gates in their new distribution centre at Eastern Creek in Sydney.

The project was built and completed by Schultz & Burns Projects and was the second installation of the Tru-Gard™ barrier system for Manassen. The modular hand rail system was designed by TBI for Schultz & Burns and has now become a standard product line. It helps keep staff separate from forklift areas and the inherent dangers they pose.

The use of personnel gates mean staff have to make a conscious decision before entering forklift traffic areas. The powder coated yellow finish makes the barrier system highly visible in all areas of the distribution centre.

Want to know more contact us now at [info@tru-bilt.co.nz](mailto:info@tru-bilt.co.nz)

## Aussie Distribution Centre

TBI are pleased to announce the opening of our new distribution centre in Wollongong.

We now have a wide range of Tru-Gard™ barrier and bollards in stock ready for despatch anywhere in Australia.

So now if you want 1 or 100 we can fill your order on the same day without the added cost of Trans Tasman shipping. All you need to do is send us your order and we will do the rest

## Meet The Team—Mary

Mary has the important role of being the first person you speak to at *TBi*. Having just completed her second year with *TBi* Mary also looks after the accounts dept . A passionate cook and connoisseur of coffee she helps keep everything flowing from the first enquiry through to the final invoice. Feel free to contact Mary at [mary@tru-bilt.co.nz](mailto:mary@tru-bilt.co.nz)

---

## TRU-DRIVE™ Automated Door Motors.

At 115mm wide the Ditec motors used for the *TRU-DRIVE™* systems are the narrowest on the market making them perfect for those tricky installations. They come in a pre-wired standard kit with a hold to run switch, a pre-wired logic kit with remote and custom built 3 phase variable speed drives with advanced logic. All models are jack shaft mounted and have an emergency override function.

*Ditec 4 channel remote*

*Ditec motors are available in both single and 3 phase*

***Manufacturers of Quality Dock, Door & Safety Products***

## Workshop News - Yet More Expansion

Due to the sheer size of some present and upcoming projects *TBi* have recently taken over the building and workshop next door to our head office in Dunedin. The new premises have added approximately 600 sq m of workshop floor space taking us to a total of 1500 sq m to work with.

Recently completing three of five *Tru-Sound™* vertical lift sound proof doors for Stone St, Studios in Wellington is only one of the many large projects on the go at the present time. *TBi* taking on more workshop and workshop staff to help with the ongoing workload was critical and will help with 2010's busy outlook.

*Bring on 2010!!!*

***Innovation + Dedication = Success***
